To Our Distinguished Colleagues and Valued Industry Partners,

We are honoured to announce that DHS is hosting the inaugural International Congress on Diastasis Recti and Abdominal Wall Reconstruction in collaboration with the American Hospital Dubai. This conference is dedicated to enhancing our understanding of rectus diastasis and advancing techniques in abdominal wall reconstruction.

We are bringing together a distinguished panel of experts, including leading surgeons, researchers, and clinicians from across the globe spanning the USA, Colombia, Brazil, Spain, Portugal, Romania, Italy, Greece, Singapore, and the Middle East—who are all committed to excellence in abdominal wall surgery and patient outcomes.

Rectus diastasis, often underestimated in its clinical significance, presents ongoing challenges to our diagnostic and therapeutic strategies. Likewise, the field of abdominal wall reconstruction is multifaceted and rapidly evolving, necessitating a multidisciplinary approach coupled with continued innovation.

As we continue to build momentum, I encourage surgeons, researchers, and healthcare professionals to join us and participate in this important dialogue. I would like to extend my deepest appreciation to our invited speakers, faculty members, and all participants for your contributions, which will undoubtedly enhance the success of this conference.

Your dedication and active engagement are what truly elevate this gathering. Thank you once again, and I look forward to an inspiring and productive conference filled with collaboration and knowledge-sharing.

Sincerely,

Sherif Beshara
Conference Chairman
Group CEO of Mohamed
